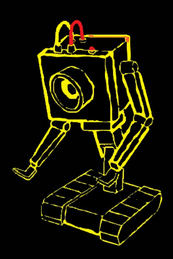
PrintStation

YOUR PRINTING REQUIREMENTS, MADE EASY.

WHAT IS MY PURPOSE ?



The purpose is to ameliorate the hassles of the printing process at universities. Users will no longer have to constantly worry about when the stationery is open. Queues that cause long delays would be a thing of the past. Once an order is placed by a user, they can go about their regular daily activities. They will be notified when their order is ready. The main benefit of PrintStation is that it easens the process of printing and dealing with supplies for both, the users and the admin.

SO... WHAT'S THE PROBLEM ?

There is an inherent problem with the current way of availing services from university stationeries.

Students and Faculty have to be mindful of when the stationery is open and operated by the people in charge.

Queues and long wait times are another factor to consider, especially during peak hours.

Students & Faculty would have classes and other tasks that require their attention and cannot afford to spend too much time at the stationery.

PROCESS

1. Users can easily upload their documents that they require printed using the web portal.
   User can also order stationery supplies through the web portal, as well as the mobile application.

2. The students would pay for their orders using a credit system.
   Credits can be refilled using cards or paying cash at a designated location.

3. The administrator at the stationery would carry out the print and supply requests, and keep them ready.

4. Once the request for each user is marked as completed, a notification is sent to that user stating that their order is ready for collection.

No More Queues

Free Credit for New Users
